About Faculty Development Programme (FDP)

The Paradigm is being shifting from 'Fear of Failure' to 'Hope of Success' because of efforts being taken by Entrepreneurship Development Institutes, Educational Institutes. NGOs and many dynamic personalities in last one or two decades.

Now there is awareness about Entrepreneurship amongst public at large. People have come to know that it is necessary to take moderate risk to become success, people know that there are many opportunities in services & business, Some are identified many are hidden; but they are aware that if these are not tapped by us; certainly others will coughed them. They have developed a little vision. Students are also aware about some concrete business ideas.

Team Entrepreneurship, Group Entrepreneurship has come up with IT and SHG revolution, The support from support agencies is also increasing. Private financial institutions and schemes like Venture Capitals (VCs) have come ahead. VCs are looking forward for innovative business ideas and proposals. Because VCs have brought new fund ahead that Innovative business means super profits. The no. of success stories has also increased. And thousands of Thought Leaders' are inviting freshers to the field of adventures. General image of an entrepreneur is getting popular now a days.

It shows that we are succeeded in making Entrepreneurship a popular word & area of interests to many.

But it is not in proportion with the population, percentage wise we have to go mails. Teachers, Trainers, Counselors are the change agents and have to play a key role in this development process. And it is not possible without making Teachers X+ something. Therefor the FDP has been designed to make Teachers / Professors strategic; healthy entrepreneurial habitual, equipped with knowledge, skills and entrepreneurial attitudes.

It will help us to grow the percentage of Entrepreneurship from 1 % to 15% in the society.

Objectives of Faculty Development Programme

The FDP will facilitate the learning process of faculty members in Engg. colleges, Polytechnic, Science & Management colleges for Entrepreneurship Development. And our efforts will be to develop them as Resource Person' in identifying, training, motivating, guiding, young students to take up Entrepreneurship as their first choice.

The specific objectives would be :

- 1) Expose faculties to Entrepreneurship Development process and equip them to conduct Entrepreneurship Development related activities at their respective colleges.
- 2) Well equip these faculties with required information, skills, competencies for organizing Entrepreneurship Awareness Camps (EAC) and other related activities on the campus.
- 3) Encourage them to start 'Entrepreneurship Development Cell' (EAC) at their college and run it successfully,
